

Hammaka Bukuro

Parts List:

You have one piece that comprises the Hammaka Bukuro:

- *The ComfortFoam Insert inside this duffel with a removeable cover:*

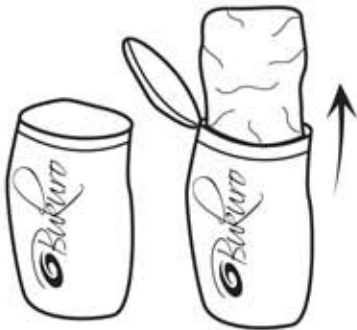

Make sure all of the above pieces are included prior to use. If anything is missing, please contact Hammaka at 877-426-6252.

Unpacking and fluffing your Bukuro:

Your Bukuro needs to be unpacked and fluffed before you *Climb In* and *Hang Out*. The ComfortFoam insert inside this duffel takes between three to five days to reach its full size and cushion, so follow these steps and be patient:

1

Remove the insert from this duffel by unzipping the zipper and carefully removing it.

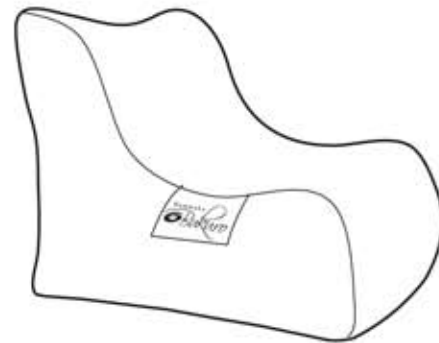

2

Break apart the ComfortFoam inside of the Insert. It has been packed tightly and needs to be separated. **DO NOT** open the Insert to break the foam, and **DO NOT** remove ComfortFoam from the Insert. Once the memory foam has been broken apart on one side, flip the Insert over and break apart the foam on the other side. Continue flipping and breaking apart the foam until there are no large pieces of foam remaining in the Insert. This process introduces air into the Insert and gives it shape.

3

Sit back and enjoy!
(Allow 3 to 5 days for your bukuro to reach its full size).

Each time you use your Bukuro, rotate, fluff, and punch it. The more you do this, the more comfortable the Bukuro becomes. Failure to do this, over time, may cause the Bukuro to lose its shape and fluffiness.

Caring for your Bukuro:

When the Insert requires cleaning, do not open it. Always leave Insert closed, as opening it will only cause a mess. Spot clean the Insert with mild soap and water. Should the Bukuro get wet, quickly remove the cover and place the Insert in a well-ventilated area until dry. See cleaning instructions for the changeable Cover on the cover tag, located on the inside of the Cover. Register your 2-year warranty at www.hammaka.com.

WARNING

Do not allow children to play unattended on the Bukuro

Do not remove the ComfortFoam from the Insert

Do not jump on the Bukuro

Do not lay underneath the Bukuro

Keep the Bukuro away from heaters, fireplaces, and other sources of heat, as the Bukuro is flammable
